The **Greeting Cards** project is a simple React app designed to showcase a collection of greeting cards. The app starts with a welcoming header at the top, styled with vibrant colors and a clean design. Below the header, three cards are displayed, each with a unique title and heartfelt message—for example, "Happy Birthday!" or "Thank You!"

The project uses reusable components to keep the code organized. The **GreetingCard** component is responsible for rendering each card, while the **Header** component displays the title of the app. Tailwind CSS was used to style everything, giving the app a polished and modern look with minimal effort.

Welcome to Greeting Cards

Happy Birthday!

Wishing you a fantastic day filled with joy!

Congratulations!

Great job on your achievement!

Thank You!

Thanks for your kindness and support!
